## About Me

---

In the last couple of years I have begun my Production Design journey, having enjoyed many years working as an Art Director for some talented Designers.

My years as an Art Director have taught me how to achieve a high level of detail whilst making the budget work as hard as it can. I like my sets to be authentic and characterful, and I communicate ideas through providing visual references.

My portfolio of work is varied and I would love the opportunity to expand on or add to my previous work. I'm a creative problem solver who loves to get my team fully involved and I enjoy working collaboratively with other departments to achieve a unified show.

References can be provided upon request.
